

1. Open your settings and select General

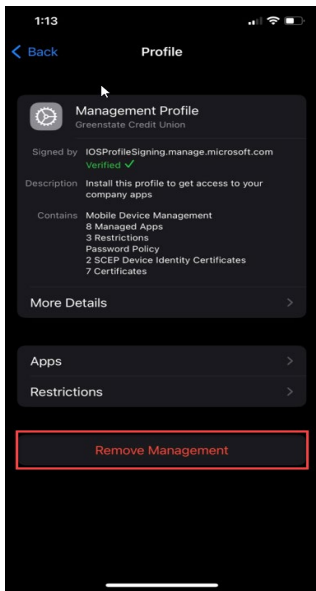

2. Select VPN & Device Management

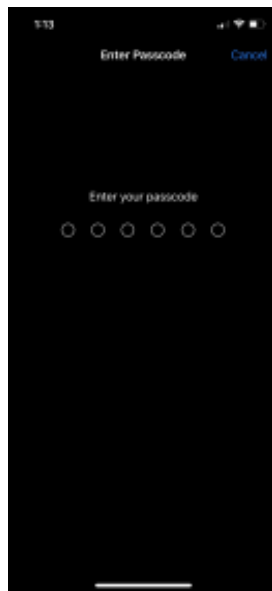

3. Select Management Profile

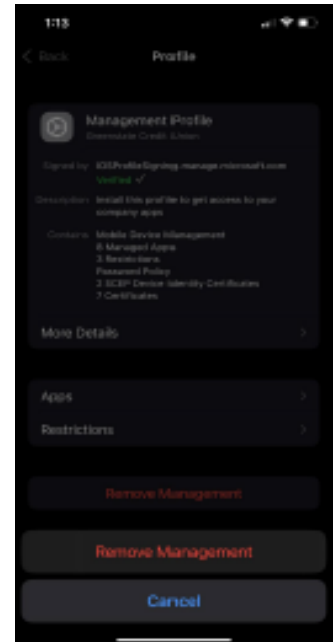

4. Select Remove Management

5. Enter your Apple pass code

6. Proceed to remove management profile

Android Management Profile Removal Instructions

Open you settings and search "Work Profile."
Then select Uninstall work Profile

Depending on your model of Android your work profile will be in different places. Searching "accounts" from your settings menu will take you to one of the following places. Once you locate your accounts page you will select the "Work Profile" option and then "Remove Profile."
